

Proxidyne Platform

Proxidyne Platform helps your store grow sales, improve customer service and maximize staff effectiveness by automating your in-store communication. Powered by Proxidyne's Bridge, Relay, and Repeater, Proxidyne Platform gathers data from Inputs including your existing anonymous sensors to monitor customer actions in the store. Our Bridge applies your rules to trigger Outputs including radio announcements, text messages and analytics.

Benefits

- **Increase Revenue:** Dispatch staff to assist a customer who's standing in one area that indicates they may be ready to purchase.
- **Reduce BOPIS Pick Times:** Notify staff immediately when an online order has been placed.
- **Improve Staff Allocation:** Alert staff when customer enters important aisles to capitalize on opportunities.
- **Improve Customer Service:** Help customers promptly without disruptive PA announcements.
- **Reduce Checkout Lines:** Alert staff automatically as soon as line length exceeds maximum.

Respond to Change

Buy Online, Pickup in Store

Delight customers heading to the store to pickup online orders by alerting staff so the order is ready.

Curbside Pickup

Satisfy customers with prompt service via automatic staff dispatch.

Unstaffed Area & Key Aisles

Increase sales by notifying staff when customers approach an unstaffed service counter or enter a high value aisle.

Customer Assistance Requests

Reduce waiting by notifying staff immediately of customer requests.

Queue Management

Reduce checkout times by alerting staff when lines get long.
