

Proxidyne Button

Proxidyne Button lets your customers and staff press button to broadcast a message to your two-way radio. You control the message for each button via your Proxidyne Bridge.

- **Wireless:** Installs easily with secure bracket requiring no wires
- **Flexible:** Change announcement anytime via web UI
- **Powerful:** Select or record a different announcement and group, i.e., channel, for each button 1, 2, 3 or 4
- **Compatible:** Transmit to existing radios or smart phones
- **Trackable:** Real-time analytics with the Proxidyne Platform
- **Secure:** Uses industry-standard security
- **Range:** Up to 300,000 sq ft

Customize button's colors, graphics, backlighting and other options!

Call Button

Place a custom call button anywhere. Notify staff when a customer presses the button.

Fitting Room

Customers can press a button inside the fitting room to ask for assistance for that specific room.

Customer Service Desk

Call staff to a service desk with the press of a button that triggers a radio broadcast.

Cashier

Keep cashiers working with buttons to call for assistance such as change, price check, open another register and manager needed. Requests can be delivered to the right audience by radio, text or other medium.

Technical Specifications

Network Connectivity	Bluetooth 4.0
