

Proxidyne Repeater

Trigger messages on Proxidyne Bridge from wireless sensors located anywhere in your facility.

Extend the range of your Proxidyne Buttons, Relays or other Repeaters.

A single Proxidyne Repeater can extend the range of many Proxidyne Buttons, Relays or other Repeaters.

Features

Range: Up to 150 ft extensible with another Proxidyne Repeater

Powerful: Relays communication for any number of Proxidyne Buttons, Relays and other Repeaters

Wireless: Installs easily requiring no wires just double sided foam tape

Secure: Uses industry-standard security

Hassle Free: AC power for non-stop operation

Example Uses

Extend Coverage

Install sensors and buttons throughout a facility linked to a single Bridge in a wiring closet.

Extend Coverage

Install buttons at cashier stations and connect to Bridge at the back of the store.

Eliminate Dead Spots

Have WiFi dead spots? Proxidyne Repeater easily reaches your sensors and buttons from corner to corner.

Technical Specifications

Network Connectivity	Bluetooth Low Energy (BLE) version 4 (Bluetooth Smart)
Power	AC
Battery Life	Up to 1 year
Security	AES-128 Encryption
Bridge Compatibility	Version 2.0 or later

Increase the distance between your wireless sensors and your Bridge. Our Buttons broadcast up to 150 ft. With Proxidyne Repeaters you can increase that distance to the length and breath of your facility.
