

Proxidyne Platform Solution

Unstaffed Areas

Increase staff allocation and reduce loss by using Proxidyne Platform to notify floor associates when customers arrive in unstaffed areas. Notifications are sent to existing two-way radios or handhelds resulting in quick response and without overhead announcements. Proxidyne Platform provides accurate and customizable dwell detection so your staff is only notified when

Features

- Announce the order directly your floor staff using your existing two-way radios or handhelds
- Easy integration and setup
- Customizable with tones, announcements
- Expandable with sensors including call buttons, pressure mats, motion cameras
